PROFILE

Creative Software Engineering student specializing in Frontend and Mobile Development. Experienced in building responsive, high-fidelity applications using Flutter, Next.js, and modern layouting workflows. Adept at leveraging AI-assisted development and prompt engineering to accelerate prototyping, MVP development, and deployment. Passionate about bridging the gap between clean code architecture and intuitive UI/UX design to deliver seamless, user-centric digital products.

EDUCATION

Universitas Duta Bangsa Surakarta Bachelor Degree Candidate — Software Engineering Technology (D4 TRPL) Surakarta, Indonesia | 2023 – Present

SMK Muhammadiyah 3 Surakarta Vocational High School Graduate — Computer & Network Engineering (TKJ) Surakarta, Indonesia | 2020 – 2023

EXPERIENCE & PROJECTS

KKN-T Desa Banyusri Kelompok 22 UI Director & Frontend Developer Boyolali, Indonesia | Jul 2025 – Aug 2025

- Lead the visual direction and user interaction flow for the official village profile web application.
- Utilized an AI-driven coding workflow to rapidly develop, test, and deploy features, ensuring a refined and responsive user interface.
- Collaborated with local stakeholders to deliver clean layouts using HTML, CSS, JavaScript, and Node.js.

Academic & Personal Tech Projects Frontend & Mobile Developer Surakarta, Indonesia | 2025 – 2026

- ToDoList App: Conceptualized and built a clean task management mobile app using Flutter and Supabase, focusing heavily on mobile UI layouting and component spacing.
- Hyo AI Mobile App: Designed a productivity-focused mobile application playground to explore high-fidelity layouting, complex feature trees, and prompt-based styling via Flutter and SQLite.
- Sistem Peminjaman Aset Kampus: Designed the user journey and interface assets, implementing clean visual frameworks using Bootstrap layouts over Go architectures.
- CSPB Android Xash3D Porting: Part

Content Creator & AMV Video Editor (Nxta.Div) Independent Creative Remote | 2019 – Present

- Developed a strong foundation in visual pacing, multi-layer asset transitions, and asset manipulation.
- Managed regular content delivery by transforming audio beats into fluid motion graphics and digital media storytelling.

Particle Komputer Technical Support Intern Surakarta, Indonesia | Jan 2022 – Mar 2022

- Handled practical hardware maintenance, OS deployment, and technical troubleshooting under direct retail timelines.

SKILL

- Developer Ecosystem: HTML, CSS, JavaScript, Next.js, Tailwind CSS, Bootstrap, Flutter, Dart, Go, Node.js, Supabase, PostgreSQL, SQLite, Firebase, Git, GitHub, Vercel.
- Design & UI/UX: UI/UX Design (Figma), Prompt Engineering, Rapid Prototyping, Component & Layout Slicing, Asset Manipulation.
- Soft Skills: Collaboration, Agile Problem Solving, Technical Communication, Critical Thinking. • Languages: Indonesia (Native), English (Conversational).
- Certifications: Computer & Network Engineering Competency (2023), Graphic Design & Personal Branding Seminar (2024), Promotional Media Animation Workshop (2023).
