PROFILE

Multimedia Specialist and Creative Technologist with a strong foundation in visual storytelling, motion graphics, and digital branding. Proficient in executing precise video pacing, multi-layer asset transitions, and VFX using professional suites like Adobe After Effects. Experienced in directing creative campaigns, UI visual guidelines, and interactive media. Combines technical adaptability with a distinct creative vision to produce high-impact digital content and engaging user experiences.

EDUCATION

Universitas Duta Bangsa Surakarta Bachelor Degree Candidate — Software Engineering Technology (D4 TRPL) Surakarta, Indonesia | 2023 – Present

SMK Muhammadiyah 3 Surakarta Vocational High School Graduate — Computer & Network Engineering (TKJ) Surakarta, Indonesia | 2020 – 2023

EXPERIENCE & PROJECTS

Content Creator & AMV Video Editor (Nxta.Div) Independent Creative Remote | 2019 – Present

- Built a strong background in visual pacing, precise video cutting, multi-layer asset transitions, and light VFX using After Effects, Alight Motion, and CapCut.
- Cultivated a distinct visual identity, successfully translating audio beats into fluid motion graphics and storytelling for digital media.
- Managed end-to-end asset production, including creative layouts and multi-format video rendering for online portfolios.

KKN-T Desa Banyusri Kelompok 22 Creative Media Lead & Content Architect Boyolali, Indonesia | Jul 2025 – Aug 2025

- Spearheaded the entire creative publication package for the community team, including social media feed architecture, high-impact video recaps, and local MSME branding.
- Directed the user interface guidelines for the village profile portal to ensure accessibility and professional branding.
- Designed high-fidelity interface assets and promotional media layouts.

Academic & Interaction Design Projects Multimedia & Interaction Designer Surakarta, Indonesia | 2025 – 2026

- ToDoList & Hyo AI Apps: Designed clean user interface concepts, high-fidelity layouting, and custom application icon styling using Figma and Flutter frameworks.
- Sistem Peminjaman Aset Kampus: Created intuitive user journeys and designed frontend interface assets using modern layout frameworks.
- CSPB Android Porting Project: Handled community game asset manipulation, texture adjustments, and technical adaptation for custom mobile environments.

Partiele Komputer Technical Support & Customer Care Intern Surakarta, Indonesia | Jan 2022 – Mar 2022

- Handled client consulting and practical hardware/software configuration, enhancing real-time problem-solving under strict timelines.
